d.) Remarks

The present amendment is submitted as a supplemental amendment to the Amendment of September 24, 2010. This amendment is offered to clarify the claimed invention by stating that there is one or more graphic control devices and 5 one or more corresponding chart components created by the method of the invention. This change, which appears in every independent claim, covers a situation in which only one graphic device and/or one chart component is deployed. Applicant is entitled to this claim language, based on the thorough specification, and this claim language does not alter the allowability of the claims 10 over the prior art. It is respectfully requested that this amendment, in addition to the Amendment After Third Action of Sept. 24, both be entered, as they do not conflict in any way.

It is believed that all claims are allowable, and that this application is in condition for issuance. Action toward that end is earnestly solicited. No new fee 15 is necessitated by this amendment.

Respectfully Submitted,

Howard Cohen
